# Build your very own chair!

## Back and seat:

- Three back sizes
- Integrated headrest shape on high back models
- Applied ergonomics : lumbar support and lateral support for all versions
- Ultra-Flex® technology on steel structure or molded wood
- Polyurethane highly resilient foam slab

## Ultra-Flex:

The Ultra-Flex® technology consists of a latex coated elastomer membrane mounted on a tubular steel frame. This technique increases flexibility and allows a perfect distribution of the body weight on the whole seat, reducing pressure for a better blood circulation and providing long term comfort.

## Arms:

- Comprehensive choice based on function, comfort and aesthetics
- Urethane arms for conference and visitor seating
- Height and width adjustable arms for improved ergonomics

## Mechanisms:

- Choice of five "ergo type" mechanisms for best posture and individual adjustment
- Swivel/tilt with block and lock system, gas cylinder or knee-tilt system for a more executive look, the conference room, etc.
- Manual (screw column) or gas cylinder height adjustment

## Bases:

- 5-prong base, polished aluminum or black nylon (standard height or designer stool height)
- Sled base or 4-legged base with or without casters for waiting rooms, side chairs, etc.

lovedflex

This renowned series allies upscale technology, design, and the famous "Flex" comfort with an exclusive do-it-yourself customization ability. Build your own chair: choose between different backs and seats to address comfort issues, choose the right armrest for your needs, and the mechanism from the simplest to the most sophisticated to suit your functions. Now take it for a test drive!
