

LEADER 1 KEYBOARD SYSTEM

LEADER

The advanced LEADER1 keyboard system meets the latest ergonomic standards of ANSI/HFES 100-2007 Human Factors Engineering of Computer Workstations as well as ANSI/BIFMA G1-2002 Ergonomic standards.

LEADER 1 KEYBOARD SYSTEM

LEADER

Features

Lever-free arm

- Adjusts easily
- Stable platform

Above and below the desktop

- Lifts 2" above desktop
- Most suitable arm to fit widest range of user heights

Negative and positive tilt

- Positive tilt is needed by hunt and peck typists, pregnant women, and reclined sitting keyboarders
- Reclined sitting is recommended by ergonomists and by new ANSI/HFES 100-2007 ergonomics standard
- ISE supports reclined sitting keyboarding and makes the required positive platform angle adjustment intuitive and easy to use

Platform front edge is sculpted to fit any keyboard , rectangular or curved

Dual mousing surface

- Retracts on left and/or right, Mouse-Forward Design, Stores under platform
- Built-in copy holder places document directly in front of user and lets them keyboard more productively and safely. Prevents straining neck and eye movements that result from documents placed flat on the desk and off to the side

No tools or hardware involved in installation

- Takes seconds to attach a platform
- Saves installation costs
