

Desk Essentials

CPU Holder

CPU holder is designed to hang from the front modesty panel – no drilling is required. The holder can be easily re-positioned along the underside of the desktop. Holder will accommodate a CPU up to 8" wide x 18" deep x 22" high.

Keyboard / Mouse Holder

Keyboard and mouse holder mounts below the monitor. The holder stores the keyboard and mouse when not in use, and protects them from damage. Allows all computer equipment – keyboard, mouse, and monitor – to be stored-away under the desktop.

Swivel And Tilt Mount

Swivel and tilt monitor mount allows the user to manually tilt the monitor up and down, and swivel the monitor left to right. Tilt and swivel range is 10 degrees from center. The mount attaches to the standard VESA mount on the electric lift.
